

About this App

This app was created as an entry for the FBLA Mobile Application Development event. In creating this app, I used the following free tools:

- CSV to JSON - to convert the quiz data into JSON
- Excel - to create the quiz data
- Github - to store and track my software versions, store publicly-accessible source code, and host the web app.
- GitKraken - a GUI tool to work with Github.
- Phonegap - to convert the web pages into an app
- SlickQuiz - to generate and display the quizzes
- Visual Studio Code - to edit the app's pages
- XCode - to convert the app into an IOS app

This open-source app is hosted on Github and is under GPLv3-licensed. The binary releases can be accessed here, <https://github.com/ctdoan/FBLA-quizzes/releases>. Please read the installation instructions for your distribution.

Created as a HTML5, CSS, and Javascript webapp, this app was converted into a mobile app using Phonegap. The original

1  # FBLA-Quizzes
2
3  A mobile app quiz to test your knowledge of FLBA in 5 different categories: history, National Leadership Conference, nation
4
5  Enjoy!
6
7  ## Installation
8
9  #### Android Installation
10
11  - Allow your device to install from unknown sources:
12    . Open the device settings. Look for a gear icon in the notification shade near the top left corner and tap on it.
13    . Scroll down to the Security section and tap to open it.
14    . Scroll down to the entry labeled Unknown sources and read the subtext because you should always read any and all
15      Read the pop-up box that tells you Google isn't responsible if you install apps from places they do not explicitly
16
17  - Go to the [FBLA-quizzes releases] page, copy the link to the latest android release
18
19  - Copy the link into a browser to download it and use the APK installer to install it
20
21  - Click yes to accept (a lot of them) and acknowledge that this is an untrusted app.
22
23
24  #### IOS Installation
25
26  I searched all over to find a way to get the certificate without having a paid ($99) Apple developer account, tried out man
27
28
29  #### Windows Installation
30
31  - Go to the [FBLA-quizzes releases] page and download the latest windows release
32
33  - Open the folder that you downloaded the APPX installation file
34
35  - Right click on APPX file
36  - Click Properties
37  - Click Digital Signatures
38  - Select the Apache Cordova Signature from the list
39  - Click Details
40  - Click View Certificate
41  - Click Install Certificate
42  - Click Local Machine
43
44  At this point, you will be asked to log in as an administrator.
45
46  - Click Place all certificates in the following store
47  - Click Browse
48  - Click Trusted Root Certification Authorities
49  - Click OK
50  - Click Next
51  - Click Finish
52
53  The system will notfiy you that the import is successful. Click OK.
54
55  Then double click on the downloaded APPX file to install it.
